**About Chakana Copper**

Chakana Copper Corp is a Canadian-based minerals exploration company that is currently advancing the Soledad Project located in the Ancash region of Peru, a highly favorable mining jurisdiction with supportive communities. The Soledad Project is notable for the high-grade copper-gold-silver mineralization that is hosted in tourmaline breccia pipes. An initial inferred resource estimate for seven breccia pipes was announced in Q1 2022 (see news release dated February 23, 2022), with 6.73 Mt containing 191,000 ounces of gold, 11.7 million ounces of silver, and 130 million pounds of copper. In addition, extensive multidisciplinary exploration has defined 154 exploration targets, 18 of which have been tested to date (12%), confirming that Soledad is a large, well-endowed mineral system with strong exploration upside. Chakana’s investors are uniquely positioned as the Soledad Project provides exposure to copper and precious metals. For more information on the Soledad project, please visit the website at [www.chakanacopper.com](http://www.chakanacopper.com).

Results of an initial resource estimate and additional information concerning the Project, including a technical report prepared in accordance with National Instrument 43-101, are available on Chakana’s profile at [www.sedar.com](http://www.sedar.com).
